New Primulinus Hybrids (Kunderdii)

This new and beautiful race of Gladiolus has been produced by crossing the fine yellow species Primulinus or Maid of the Mist of South Africa with older existing strains. They are distinguished for the varied and beautiful tints of pink combined with yellow, orange and saffron colors, graceful slender stems and airily poised flowers. Many are beautifully ruffled and hooded and of varying butterfly and orchid-like forms.

I consider the Kunderdii the best of all Primulinus Hybrids so far produced. No others are like them.

At this date, 1922, I have good stocks of the following varieties:

- ALICE TIPLADY (1915)**—Primulinus species yellow x Kunderdii. A large Primulinus of most beautiful orange saffron color. Very choice....
..... Each 30c
- ALTAIR (1916)**—A fine shade of salmon saffron; extra long spikes.....
..... Each 25c
- ALETTEA (1918)**—Purest deep canary yellow. Lower petals shaded deeper, with light golden throat lines. A very beautiful variety
..... Each 75c
